

ATROMG8 ROADMAP 2021

ROADMAP

DEAR FRIENDS AND SUPPORTERS OF ATROMG8,

The year 2020 hit us hard, mainly due to the coronavirus pandemic. As an international network we had to learn to work together under new and challenging conditions, this included coordinating with one another remotely. Under these new conditions and despite all of the new difficulties and challenges we faced, our primary goal was to ensure that the project's development was uninterrupted so that the base platform could go online. Considering the complex situation we faced, we believe that we managed to navigate this very successfully.

The setbacks we faced also meant that we had to adapt. In some areas we were forced to restructure ourselves, in others we had to forego some opportunities which were already planned for our platform either for cost or security reasons, or to reduce them to a minimum. These included applications for student accommodation, travel tools, as well as internal exchange or various payment functionalities.

In the coming months, we will undoubtedly face new regulations around the world which should make cryptocurrencies and blockchain use more secure. This means that we are making slightly slower progress than we would like, since the various requirements and specifications have to be evaluated and reassessed by our lawyers. For this reason, our integrations into new exchanges and UNISWAP have been postponed for a few weeks, but only until we can get a better understanding of the risks involved.

But there have also been a lot of positive things to report. For example, we were able to make much better progress in the areas of health data and information exchange on the blockchain than we had originally planned. In addition, many of the partnerships which we have been working on have developed more quickly than we had originally planned. These projects are continuing to develop and will represent a supporting pillar of our platform, creating entirely new possibilities and opportunities for [ATROMG8.com](https://atromg8.com).

Also, in order to get them ready for the tasks involved in the sale and distribution of our services, we are now continuously preparing the offices in Switzerland, Italy, Brazil, India and Austria. Due to the many different and new opportunities and their potential, this brings a lot of additional work, however we are pleased to report that our professional team has already tackled a large part of this.

In order to help our supporters understand our progress and to better manage expectations, below you will find an overview of our updated roadmap. Naturally, some dates may vary since, due to the current coronavirus pandemic, we do not always have 100% planning certainty.

We have drawn up the roadmap to the best of our knowledge and belief. For the same reasons that we mentioned above, many of our project partners involved will only be able to now share data with us for the first time in the coming weeks. As soon as we have updated things, we will integrate the information into the roadmap and provide you with an updated version. Please note that we have left out anything which has not yet been formally agreed at the time of this publication.

September - November

2020

Complete test of servers and connections to make them ready for the main network.

Provision of the event platform and, in cooperation with the partners, the start of events testing.

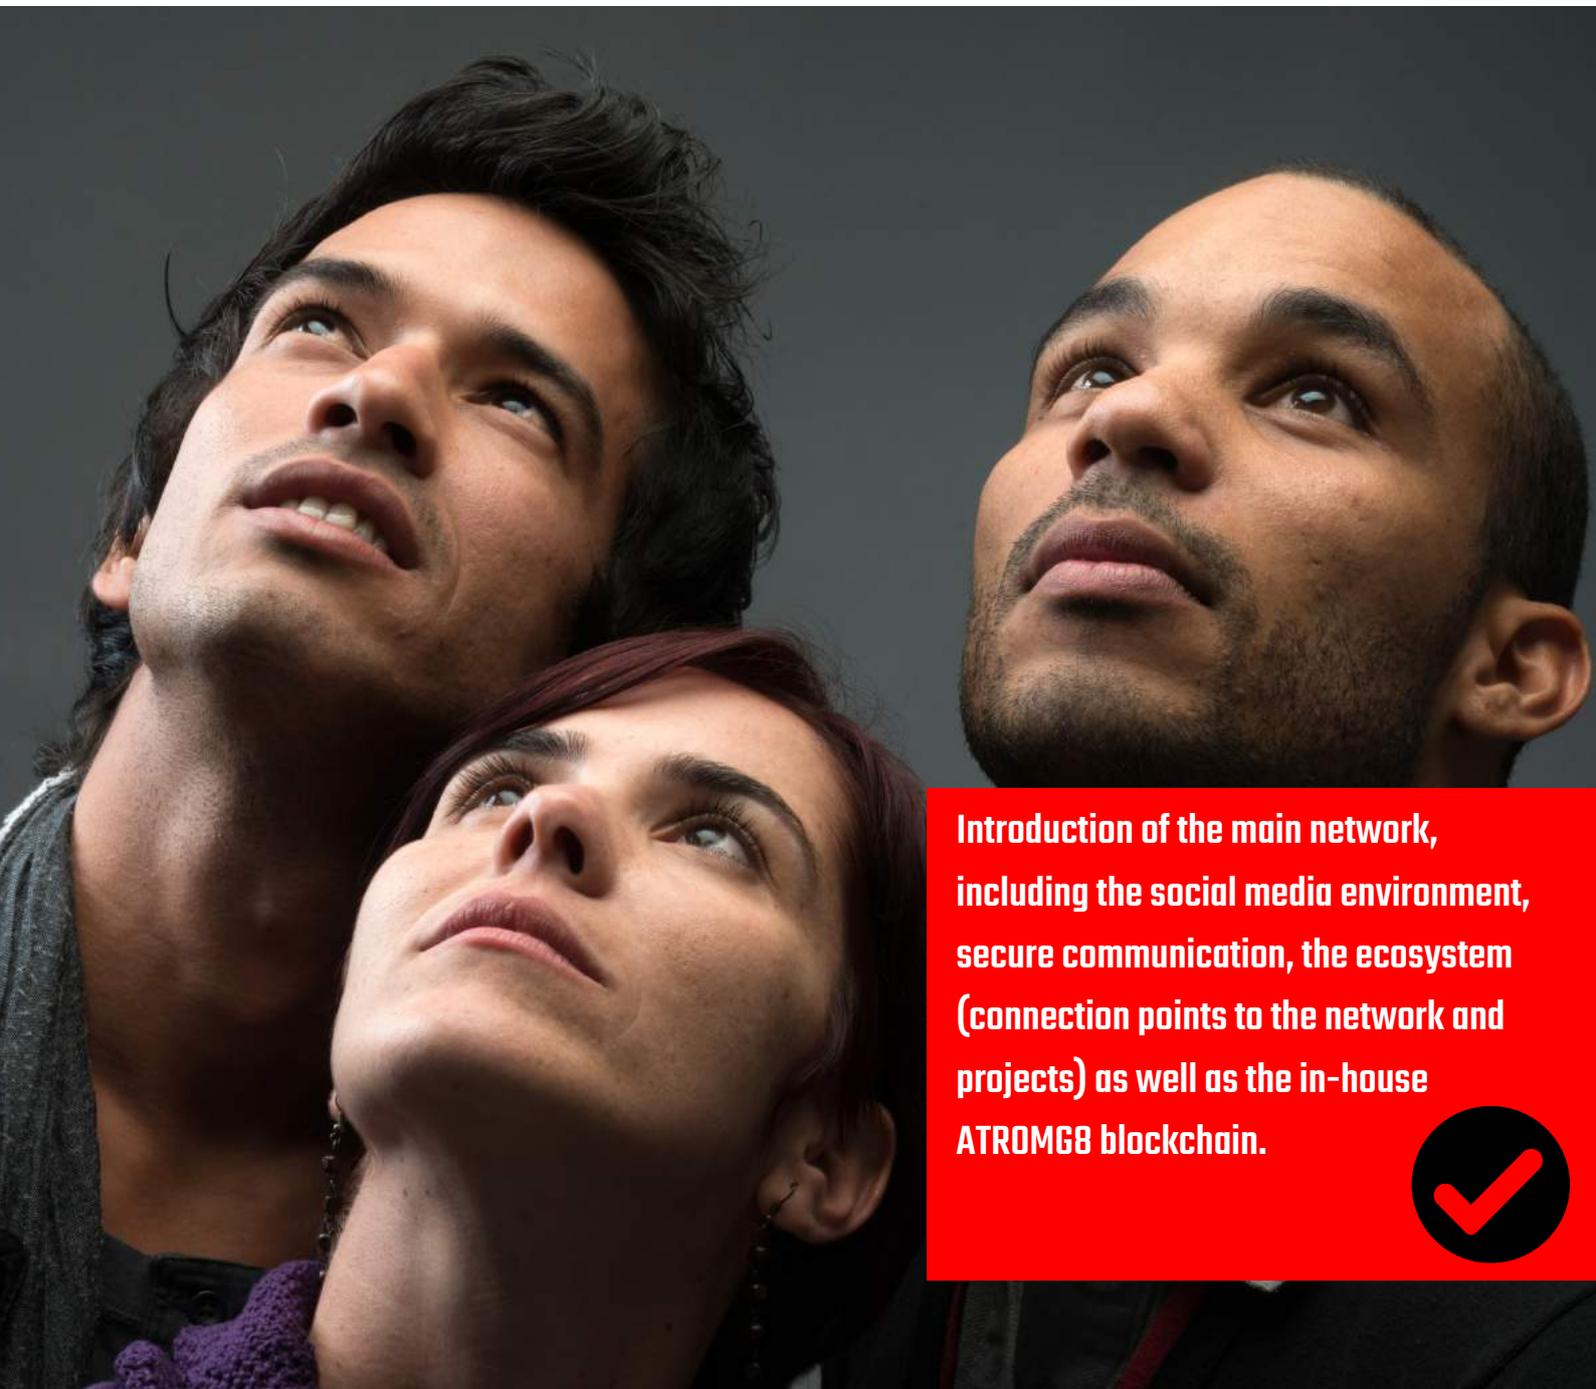

Commence training and education of the marketing and event management team.

November 11, 2020

ATROMG8 MAINNET IS LIVE!

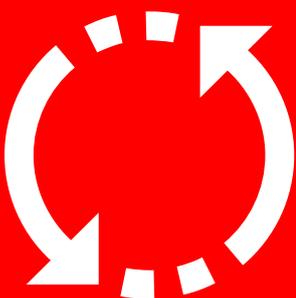

Introduction of the main network, including the social media environment, secure communication, the ecosystem (connection points to the network and projects) as well as the in-house ATROMG8 blockchain.

November 14 - December 14

SWAP process to convert the old Atrom test network coin onto the new main network utility coin for the ATROMG.com Platform.

Atromg8.com

DECEMBER 23, 2020

CHAIN OF LOVE

The "Chain of Love" project will go online from December 23, 2020. Under this initiative, 10% of all transaction costs will be deposited and distributed into specially designed wallet on the ATROMG8 platform.

The projects that we will initially support will be in the areas of environmental protection, humanitarian aid or providing support for people and organizations that aim to improve the quality of work of life worldwide. In the beginning three specific projects will be supported and in time, if the income permits, more will be added.

For the purpose of selecting initiatives, a committee will be formed which will consist partly of the community, but also of the employees and partners of the ATROMG8 project.

Atromg8.com

- Members of the community, as well as foreign organisations, will be able to present their own projects on [ATROMG8.com](https://atromg8.com) and from then on, if all requirements are met, will also be able to collect crowdfunding or receive donations themselves.
- Official provision for public use of the event platform on [ATROMG8.com](https://atromg8.com)
- Start and tender of a project competition, which was developed in cooperation with IEEE, IBREI, Accubbits Technologies, various universities and various protagonist for the Brazilian health system.
- Integration of the ATROM Coins onto new platforms such as UNISWAP.
- Commencement of new projects in the areas of short films and sports services.
- The start of the largest and most extensive marketing campaign to date on many international platforms. The stated goal is to get as many people as possible excited about the work of [ATROMG8.com](https://atromg8.com) and to bring the platform closer to them.

March - May , 2021

Provision of **EDUG8** in order to be able to offer online courses and school lessons with various functionalities that are part of today's global standard.

Completion of the phase and provision of the possibility of issuing certificates and attestations, which are kept on the blockchain. These will be used worldwide in various academic and economic areas.

The Integration of the first universities from Brazil, India and Italy.

May - August , 2021

CHAINSAT

Please note that we can only publish more detailed information once official approval has been received. For more information please see <https://chainsat.accubits.com/>
